

**Priority axis:** 1 Economy, Innovation, Modern Technologies

**Activity:** 1.1 Research and development projects companies

**Project Type:** 2 Research and development projects of companies directed at implementing results of R&D in business activity

**Name of the project:** Research and development of prototypes and a trial series of innovative drive machines for emission-free transportation.

**Project number:** RPZP.01.01.00-32-0021/21

**Value of project (PLN):** 6 065 106,75 PLN

**Funding amount (PLN):** 3 401 258,75 PLN

**Project target:** Industrial research and experimental work aimed at development an innovative technological product – the creation of a prototype and test series for drive machines for the applications to drive systems in emission-free transport.

**Planned effect:** Innovative product for the transport sector that it based on the latest material technologies with potential to be adopted to costumers needs, designed to power and drive public transportation, machines and vessels, ready for implementation.
